

# the professional dark spot solution

new powerbright ionactive serum

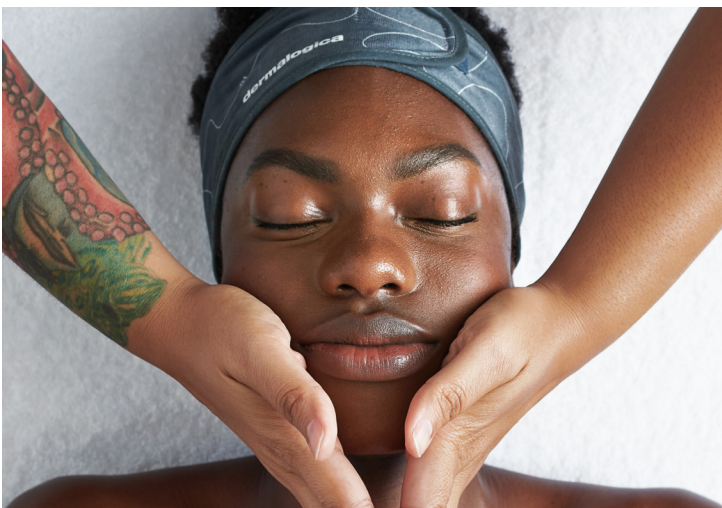

## the benefits

reduces the appearance of dark spots

brightens skin

evens skin tone

## 3 ways to use powerbright ionactive serum

1 with electrical  
modalities

2 with facial  
tools

3 under a  
masque

People struggling to fade dark spots often turn to professional skin treatments in an attempt to speed up the process. Many conventional solutions for hyperpigmentation miss the mark, though: harsh ingredients, negligible results and a lack of treatment-room flexibility can all make it difficult to achieve results.

## PowerBright IonActive Serum changes that.

Formulated with advanced dark spot-fading ingredients, it starts working fast to fade the appearance of uneven skin tone – and works synergistically with your client’s at-home PowerBright regimen to deliver amplified results.

### what is it?

---

A professional ionizable serum that uses potent actives to reduce the appearance of dark spots and uneven skin tone.

### why you need it

---

Formulated with advanced Niacinamide, Hexylresorcinol and Oligopeptide-4, PowerBright IonActive Serum starts working fast to fade the appearance of dark spots. It’s also versatile: its ionizable formula and slip and glide make it ideal under masques and with modalities.
