

# salicylic acid 15% gel peel

fast-acting peel to help clear skin imperfections

- **Helps reduce redness and irritation caused by skin imperfections**
- **Decreases sebum production**

Salicylic Acid 15% Gel Peel is the first peel formulated to work on skin despite skin conditions like blemishes linked to inflamed breakouts, pustules, papules, ingrown hair, impaired barrier, comedones, scarring tissue or keloids.

## what it is

Salicylic Acid 15% Gel Peel is a unique chemical peel with a gel consistency to target skin imperfections along with a complex of Mushroom Extract that buffers the conditions that lead to visible signs of redness.

## who it's for

Suitable for all types of skin imperfections but was specifically designed for those with active, sensitized blemishes. It is not advised for those who are on medication for the skin (accutane, tretinoin).

**Salicylic Acid** provides effective exfoliation and minimizes skin aggravation experienced in skin imperfections.

**Mushroom Extract** provides instant soothing and skin comfort while helping to reduce skin redness.

**White Shitake Mushroom** brightens and helps even skin tone.

**Salicylic Acid 15%  
Gel Peel – 3.4oz - \$120**

A study was performed which included 20 subjects who had some form of skin imperfection or redness. Each subject received a total of 3 treatments spaced 7-14 days using Salicylic Acid 15% Gel Peel. Each used AGE Bright Clearing Serum and Retinol Clearing Oil daily in their home care routine.
