

skin condition

All skin conditions, including active blemishes, redness, and irritation.

description

A unique gel peel with 15% Salicylic Acid for maximum efficacy when targeting active, sensitized skin imperfections. Mushroom complex and calming actives buffer and soothe red, aggravated skin. Formulated to target active, sensitized skin imperfections but can be used for all types

estimated number of uses

100 mL: 40 uses

professional only

100 mL

salicylic acid 15% gel peel

professional application**double cleanse:**

- Apply PreCleanse
- Perform Face Mapping skin analysis
- Use a Dermalogica skin-specific cleanser

prep:

Apply Post Extraction Solution to degrease and prep the skin.

resurfacing:

Mix 1/2 teaspoon Salicylic Acid 15% Gel Peel with 3 full pumps Multi-Active Scaling Gel. Apply an even layer of the mixture to entire face with a fan brush.

Leave on skin for 5-6 minutes. Gently remove product with dry esthetic wipes to avoid causing friction on skin.

Apply Neutralizing Solution to deactivate and remove with damp esthetic wipes.

dermal Layering:

- Apply Dermalogica skin-specific toner
- Apply Pro Restore
- Finish with skin-specific moisturizer and Invisible Physical Defense SPF 30

key ingredients

Salicylic Acid, a potent Beta Hydroxy Acid (BHA), is a powerful breakout-fighter. It is lipophilic (oil-soluble) and can penetrate deeper into skin. This allows Salicylic Acid to minimize sebum production to unclog pores and loosens desmosomes (attachments between cells in skin's outermost layer) that will stimulate skin's natural exfoliation process.

Albatrellus Mushroom has the ability to immediately soothe skin and reduce redness, working to improve skin comfort during the treatment.

White Shiitake Extract presents enzymatic properties to improve skin brightening and luminosity by degrading melanin pigment on the surface of the skin.

Glyceryl Glucoside is a compound commonly found in plants and organisms that must be able to survive extreme drought conditions. As a result, this compound is adept at improving skin moisture content and soothing skin by helping to reinforce the skin barrier.

Xylitol, Propanediol and Caprylic Acid Complex helps to control sebum production and redness.

benefits

Helps reduce redness and irritation caused by skin imperfections

Promotes even skin tone

Decreases sebum production
