

melanopro peel system

reduce the appearance of hyperpigmentation in under 6 weeks

Transformative regimen works to visibly:

- Fade dark spots
- Reduce appearance of hyperpigmentation
- Smooth skin's texture

what it is

Melanopro Peel System is a clinical-strength peel program that delivers visible results in less than 6 weeks. This transformative 2-phase regimen works to visibly counteract environmental skin damage – fading dark spots, reducing the appearance of hyperpigmentation, and smoothing skin's texture to reveal fresh, brighter skin.

who it's for

Melanopro Peel System is an effective treatment regimen for anyone who experiences hyperpigmentation concerns: sun spots, acne scars, melasma, dull skin, rough texture. It has been tested on a wide range of skin tones.

key ingredients

A combination of powerful, well researched skin brightening actives and exfoliants to rapidly reduce hyperpigmentation and smooth texture.

- Azelaic Acid
- Tranexamic Acid
- Retinol (Vitamin A)
- Niacinamide (Vitamin B3)
- Acetyl Hexapeptide-1 (peptide)

Melanopro Peel System
\$141.25 per kit (sold per box of 4)

Pictures from and complementing clinical study (30+ subjects). Each subject received Melanopro Peel System for 6 weeks.
