

dermalogica and advanced services

Advanced skin treatments are rapidly growing in popularity due to an increase in consumer demand. Clients are seeking more results-driven services that target their main skin concerns.

what is an advanced skin treatment?

In the context of skincare, this refers to specialised treatments that require additional training, education and expertise to be performed safely and effectively.

They are designed to address:

- Specific skin concerns
- Provide targeted solutions
- Deliver more intensive and effective results

our approach

Dermalogica's approach to advanced services is to remain true to the health of the skin and safety of the client.

- We believe in skin first
- We choose progressive vs aggressive
- We practice a multi-faceted approach

consultation

A thorough and effective consultation is required before an advanced service to:

Ensure client suitability for treatment

- Eliminate contraindications
- Inform clients of any risks and contra-actions
- Prepare the skin adequately

Consultation will reduce contra-actions and amplify treatment results

scope of practice

Before performing an advanced skin treatment, you must ensure that you are qualified and have received the relevant professional training.

This will influence your scope of practice and ensures client safety as a priority.

advanced services increase profitability

Advanced services can drive a higher profit for a skin centre in multiple ways:

- Higher price point
- Pre and post service skincare
- Personalised programmes
- Repeat business
- Competitive advantage

pro power peel

the collection

Cell turnover slows dramatically as we age, approximately 20 days in younger and middle-aged adults, and over 30 days in older adults. This change affects the skin's appearance and texture. From fine lines, wrinkles, acne and hyperpigmentation, chemical peels are one of the most effective ways to address these changes. It is not a one-size-fits-all treatment. For optimal results, a peel should be strong enough to accelerate cell turnover but not so powerful as to induce severe skin inflammation.

one-step prep

- Leave-on prep solution with witch hazel and alcohol
- Degreases skin and prepares it for Pro Power Peel solutions
- No removal required

advancedrenewal peel

- 30% glycolic acid complex with opuntia flower extract and phytic acid
- Reduces appearance of hyperpigmentation
- Minimises appearance of lines and wrinkles

ultrabright peel

- 30% lactic acid complex with phytic acid, mucor fungal extract, grape juice extract and tangerine peel
- Brightens and hydrates, reducing appearance of early signs of ageing
- Helps to even skin tones

mandelic malic acid peel

- 2% salicylic acid with 10% mandelic acid
- Patented terpinol-thymol complex
- Targets blemishes, post-inflammatory hyperpigmentation and redness

neutralizing solution

- Ready to use neutraliser
- Helps soothe skin and restore natural pH

dermalogica and advanced services

pro nanoinfusion

Pro NanoInfusion is Dermalogica's branded treatment that delivers advanced professional results for skin texture and signs of ageing. Using a unique approach which includes up to 3 different ways of incorporating the Dermalogica Pro Pen to accelerate resurfacing and product penetration. Each way is a progressive step to the next level of intensity.

Pro NanoInfusion uses innovative techniques and powerful, professional-grade actives.

- Improves skin texture through resurfacing
- Boosts hydration
- Supports infusion of active ingredients into the skin
- Address signs of premature skin ageing

The most immediate visible change in the skin is a hydrated glow.

luminfusion

LuminFusion is a supercharged treatment that brings luminosity to a whole new level. This advanced service takes a unique approach with exfoliation stacking, nanoinfusion technology, targeted eye treatment and LED light therapy.

LuminFusion is a fantastic service option to attract new clients and progress results for Pro NanoInfusion clients. This treatment will:

- Improve skin luminosity
- Smooth fine lines and wrinkles
- Instantly reveal radiant skin

pro fibroblast

Fibroblast skin tightening is an aesthetic service that tightens and improves skin's appearance. This treatment uses what's often referred to as a 'plasma pen'. Skincare professionals will offer fibroblast as an alternative to lasers, injections or even surgical therapies for facial rejuvenation.

Pro fibroblast targets:

- Wrinkles and sagging skin
- Loss of volume and elasticity
- Photoaging

dermalogica and advanced services

pro microneedling

Microneedling, also known as collagen induction therapy, is a minimally invasive advanced procedure that creates micro-injuries on the skin to trigger the wound healing process. Microneedling can be more invasive when compared to nanoinfusion as microneedling reaches lower levels of the epidermis and dermis. Microneedling can treat several skin conditions like fine lines and wrinkles, skin laxity and texture, acne scars, hyperpigmentation, stretch marks and hair loss depending on depth and therapist scope of practice.

Pro Microneedling delivers your most advanced professional results for hyperpigmentation, wrinkles and pores. The unique combination of innovative techniques and powerful professional-grade actives address:

- Dull skin
- Pore refining
- Hyperpigmentation
- Lines and wrinkles

pro dermaplaning

Dermaplaning is a treatment that uses a specialised blade to remove dead skin cells and fine vellus hair. It is considered a physical form of exfoliation and leaves the skin soft, smooth and bright. Dermaplaning is safe for most people with little risk of side effects.

Pro Dermaplaning is a branded service that offers one of the most comprehensive exfoliations of any dermaplaning service.

This service will:

- Target dry, dull and damaged skin
- Fine lines and wrinkles
- Acne scars

meet pro restore

Pro Restore is a firming and recovery concentrate designed for use with micro-injury treatments to:

- Reduce downtime
- Improve skin recovery
- Amplify results

dermalogica and advanced services

With advanced procedures in high demand, these are desirable services to offer., especially if downtime is limited. However, reputable practitioners take safety and their responsibilities for client care very seriously.

Ethical practice means working within your scope of practice and upholding the appropriate regulated qualifications to ensure client safety.

best practices

- Perform a pre-consultation two weeks prior to the service
- Carry out a patch test
- Ensure the client is fully informed of possible risks, contra-actions and knows what to expect
- Only perform an advanced service if client is indicated
- Work progressively
- Provide post-care instructions and check in on the client
- Use photographs with client consent

implement

What have you learnt by practicing elevated consultations that include programmes, wrap-around skincare and informed consent
